When families choose Edventure More’s camps, Camp Edmo and Camp EdTech, they are:

1. Supporting a cause to bring equal access to high quality summer programming to kids across the Bay Area.
2. Preventing summer learning loss by providing their child, and others, with summertime enrichment activities
3. Developing multiple intelligences in their child which includes intellectual, social, emotional, and physical intelligence
4. Building life-long 21st Century skills like Curiosity, Confidence and Collaboration that will help them succeed in any life path they choose

Kids Get MORE out of Camp
The demands of the 21st Century requires that kids become more fully prepared for all of life’s challenges. The latest research has shown that character skills like curiosity, generosity and grit are even more indicative of a child’s future success than their IQ. To keep up, the goals of education are changing and teachers are moving away from traditional methods of teaching and are bringing new and innovative approaches into the classroom. Summer camps, like Camp Edmo and Camp EdTech, are also continuing the development that happens at school and taking on these new learning initiatives as well.

At Camp Edmo and Camp EdTech, children participate in hands-on activities, develop a love of learning and build the skills necessary to thrive, communicate, collaborate, problem solve and think creatively. Edventure More’s one-of-a kind life skills programs, The Edmo and EdTech Vibe Games, then promote and reinforce these traits to prepare children for the future and put them on the road to becoming happy and successful adults.

MORE Details about Camp
At Camp Edmo and Camp EdTech, there is something for every age:

Camp Edmo (Pre-K – Entering 4th Grade) Arts & Science, Animation, Nature, Recreation and Life Skills
Voted Best Bay Area Camp and Educational Support Program 2009-2013 by BayAreaParent!

At Camp Edmo, campers get MORE out of summer by participating in activities designed by Edventure More in partnership with the California Academy of Sciences & Children’s Creativity Museum. Thanks to hands-on activities, college-graduate Camp Directors and the “Vibe” program, campers build curiosity and
21st Century life skills!
Summer 2014 themes include Incredible Edibles, Magic & Medieval Times, Critterville, Planet Power, and more.

Camp EdTech (Entering 5th – 8th Grade)
Digital Media, Recreation and Life Skills
Voted Best Bay Area Technology Camp 2013 by BayAreaParent!
At Camp EdTech, campers get to make what they play and play what they make. Sessions are taught by industry pros and designed with the Children’s Creativity Museum. Kids get a chance to create androidcompatible apps, use hardware and software to control analog components like lights and buzzers, make, direct, edit & star in their own short films and animations, develop video games or express their unique perspective of the world via digital photography. At Camp EdTech, kids develop tech skills while building life skills.

Summer 2014 Sessions: 2-D Video Gaming, 3-D Video Gaming, App Creation, Maker Studio, Animation, Film Making and Animation. Optional Extended Day: Media Lab.

Camps are conveniently location in San Francisco, Marin, Contra Costa, Alameda, Santa Clara and San Mateo counties. Camp runs the weeks of June 9 – August 22 and dates vary by location.

What Families Say About our Camps
“I have never seen my son this happy in a group learning environment. His enthusiasm and enjoyment level is off the chart. I believe this week has given him a new experience of himself and others that he’ll carry forward into other group play and instruction experiences.” Liana H., 1st Grade Marina Parent

“My sons LOVE Camp Edmo and find it very engaging and enriching. I love that it adds an academic and artistic component that lots of camps don’t have – and in a very fun way...”- Michelle G., 3rd Grade San Francisco Parent

“My son uses the experiences at Camp EdTech to help him with drama and media presentations in school. This helps build his confidence in doing creative things at school and around the house.” – Luke S., 6th Grade Alameda Parent

“Thank you EdTech Staff for teaching valuable life skills in a friendly and fun environment!” – Donna C., 7th Grade Alameda Parent

“It’s fun to discuss his projects (unsolicited) when he comes home from camp. The projects seem to have really given him an understanding of project timelines and time management. His friend and camp-mate discuss what techniques and features they are implementing and that’s pretty neat.” – Ellen S., 5th Grade Noe Valley/Twin Peaks Parent
